F-Series
HYDRAULIC-MAGNETIC CIRCUIT BREAKER

The F-Series hydraulic-magnetic high amperage circuit breakers are designed to handle high current applications in extremely hot and/or cold locations. Due to its time-proven hydraulic-magnetic design, the F-Series load sensing mechanism is insensitive to changes in ambient or enclosure temperature, providing a consistent trip point over temperatures ranging from -40°C to +85°C. Additionally, the F-Series circuit breakers come with a choice of overload time delays, making them ideal for critical applications having inductive loads.

Further, the F-Series breakers are available up to 700A and an optional 25 millivolt metering shunt construction provides a safe method for monitoring current flowing through the breaker by simply connecting a meter with light gauge wire to the appropriate terminals located on the shunt housing at the rear of the breaker. Applications can be customized by measuring and displaying percentage of current, watts or safe/danger zones.

Product Highlights:
• AC ratings to UL 489
• DC voltage ratings up to 700A with metering shunt section
• Consistent trip point over temperatures ranging from -40°C to +85°C
• Optional 25 millivolt metering shunt construction

Typical Applications:
• Ideal for applications under extreme temperatures
• Higher Amperage Applications
• Battery Disconnect Systems
• Solar Power Systems
• Military

2 | F-Series Circuit Breaker – General Specifications

**Electrical**

<table>
<thead>
<tr>
<th>Maximum Voltage</th>
<th>Current Ratings</th>
</tr>
</thead>
<tbody>
<tr>
<td>125VDC, 277VAC</td>
<td>Standard current coils: 100, 125, 150, 175, 225, 250 amps. 300, 350, 400, 500, 600, 700 amps available as parallel pole construction.</td>
</tr>
</tbody>
</table>

**Auxiliary Switch Rating**

SPDT; 10.1 Amps @ 250VAC, 1.0 Amps @ 65VDC, 0.5 Amps @ 80VDC 0.1 Amps @ 125VAC (with gold contacts).

**Insulation Resistance**

Minimum: 100 Megohms at 500 VDC

**Dielectric Strength**

1960 VAC, 50/60 Hz for one minute between all electrically isolated terminals, except 2500 VAC for one minute between alarm/aux. switch and main terminals with contacts in open and closed position. F-Series circuit breakers comply with the 8mm spacing & 3750VAC 50/60 Hz dielectric requirements from hazardous voltage to operator accessible surfaces, between adjacent poles and from main circuits to auxiliary circuits per Publications EN 60950 and VDE 0805.

**Resistance, Impedance Values from Line to Load Terminal - based on Series Trip Circuit Breaker.**

**Mechanical**

**Endurance**

4000 ON-OFF operations with rated Current & Voltage & 4000 operations with no load (8000 operations total) @ 5 per minute. Parallel Pole construction: 1000 operations with rated Current and Voltage @ 5 per minute.

**Trip Free**

All F-Series Circuit Breakers will trip on overload, even when the actuator is forcibly held in the ON position.

**Trip Indication**

The operating actuator moves positively to the OFF position when an overload causes the circuit breaker to trip.

**Physical**

**Number of Poles**

1 - 3 Poles Note: Ratings over 250 Amps only available with parallel pole.

**Internal Circuit Config.**

Series (with or without auxiliary switch), Switch Only (with or without auxiliary switch).

**Available Accessories**

Factory installed: DC Current Metering Shunt (25 mV @ir)

**Weight**

Varies depending on construction. Consult factory.

**Standard Colors**

Housing - Black; Actuator- Black or White with contrasting ON-OFF legend.

**Environmental**

Designed and tested in accordance with requirements of specification MIL-PRF-55629 & MIL-STD-202 as follows:

**Shock**

Withstands 100 Gs, 6ms, sawtooth while carrying rated current per Method 213, Test Condition “I”. Instantaneous and ultra-short curves tested @ 90% of rated current.

**Vibration**

Withstands 0.060” excursion from 10-55 Hz, and 10 Gs 55-500 Hz, at rated current per Method 204C, Test Condition A. Instantaneous and ultrashort curves tested at 90% of rated current.

**Moisture Resistance**

Method 106D; ten 24-hour cycles @ + 25°C to +65°C, 80-98% RH.56 days @ +85°C, 85% RH.

**Salt Spray**

Method 101, Condition A (90-95% RH @ 5% NaCl Solution, 96 hrs).

**Thermal Shock**

Method 107D, Condition A (Five cycles @ -55°C to +25°C to +85°C to +25°C).

**Operating Temperature**

-40° C to +85° C

</tbody>
</table>

**Notes:**
- For 100 to 250 amps, select Current Code 825. For 300-400 amps, select Current Code 840. For 450-700 amps, select Current Code 870.
- Available with Frequency and Delay code 10 or 20 only, and are not rated for continuous duty. Delay 10 and 20 are only available with voltage coils.
- 3 Codes M, N, P & Q (Parallel Poles) are supplied with factory installed Bus Bar on Line and Load.
- 4 Metering terminals are female pin type, ref. Molex part number 02-09-1101, model 1189-T.
- Auxiliary Switch breakers are only available with Series Trip and Switch Only circuits. On multi-pole breakers, one Auxiliary Switch is supplied, mounted in the extreme right pole per figure A. Back-Mounted breakers require special mounting provisions when an Auxiliary Switch is specified.
- Available with parallel pole construction (circuit codes P and Q, and breakers with circuit codes M and N).
- Frequency and delay code 10 is only available with Voltage Coils. Voltage Coils are not rated for continuous duty.
- Ratings over 250 amps are only available with Agency Approval code T (UL489A) and are Parallel Pole configuration (circuit codes M, N, P and Q). 300-400 amp ratings are available on two pole breakers. 500-700 amp ratings are available on three pole breakers.
- Per UL requirement, an “Anti-Flash Over Barrier” is supplied between poles on multipole breakers with 3/8 – 16 stud terminals (Terminal Code 1) on AC rated breakers only.
- Front connected breakers can also be front mounted by utilizing the supplied front panel mounting inserts. Terminal connections must be made before mounting.
- Box Wire connector will accept #6 through 250 MCM copper wire.
- Other colors available. Consult factory.
- 4 or 3-Pole Circuit Breaker Required for 120/240 VAC Rating.
- 3 Pole Circuit Breaker Required for 120/208 VAC Rating.

F-Series Circuit Breaker – Dimensional Specifications

F-Series breakers are available up to 700A, and are also available with a 25 millivolt metering shunt construction. This optional construction provides a safe method for monitoring current flowing through the breaker by simply connecting a meter with light gauge wire to the appropriate terminals located on the shunt housing at the rear of the breaker. You can customize the application by measuring and displaying percentage of current, watts or safe/danger zones.

About Carling

Founded in 1920, Carling Technologies is a leading manufacturer of electrical and electronic switches and assemblies, circuit breakers, electronic controls, power distribution units, and multiplexed power distribution systems. With four ISO9001 and IATF16949 registered manufacturing facilities and technical sales offices worldwide, Carling Technologies Sales, Service and Engineering teams do much more than manufacture electrical components, they engineer powerful solutions! To learn more about Carling please visit www.carlingtech.com/company-profile.
