With decades of design and manufacturing experience, Carling Technologies offers a complete line of hydraulic-magnetic circuit breakers offering maximum circuit protection for signaling and infrastructures in the railway industry. With over nine decades of product development and manufacturing experience, our products are ideally suited for applications with the most stringent requirements.

ADVANTAGES: Hydraulic-Magnetic Circuit Protection

- Not affected by extreme temperatures
- The overcurrent sensing mechanism reacts only to changes of current in the circuit being protected
- No heat induced tripping and no cool down necessary for resetting
- Common trip linkage assures all poles trip during overcurrent conditions
- Ratings of .02 to 700 amps up to 125VDC & 600VAC

Carling Technologies RAILWAY hydraulic-magnetic circuit breakers are designed in compliance with industry safety standards:

- EN 60977
- EN 45545-2
- NF F16-101
- IEC 61373
- EN 60077
- EN 45545-2
