Carling Technologies’ high-performance N-Series hydraulic-magnetic circuit breaker is ideally suited for the rigors and confined spaces of telecom and datacom power distribution units and rack systems. Its innovative, low profile design features easily accessible load and line terminals and sliding barriers for effortless installation.

With the integration of an optional current transformer, the N-Series is capable of sensing current down to a level of 1%. This optional capability provides precise current monitoring and reporting required for back billing of the actual power consumed by datacenter storage and routing devices. This feature also facilitates load adjustments and maximizes efficiency. A patent pending, flush-rocker actuator and push-to-reset guard offer additional protection against accidental switching.

**Current Metering**
Integrated current transformer. Measurement range: 1-30 Amps. Voltage output: 10mV per Amp according to the formula below:

\[ V = 0.01 \times I \pm 2\% \]

(with current metering codes 1 or 2)

\[ V = 0.01 \times I \pm 1\% \]

(with current metering codes 3 or 4)

\[ \frac{|V - V_{10}|}{V_{10}} \leq 0.85\% \]

Where \( V = \) CT output in volts

\( V_{10} = \) CT output in volts with

\( I = I_{10} = 10 \) (A); \( I = \) primary current in amperage (50/60 Hz). Phase shift between primary current and CT output is 0.25±0.25°. Maximum crest factor of primary current is 1.73.

R1 shall be integrated in the breaker. R2 and R3 are provided by end user and external to the breaker.

Connection: below Load Terminal. 2-pin connector, Molex 35362-0250. Mating Connector housing – Molex PN35507-0200.

(Current metering is available on AC rated devices only)

\[ I \sim (FROM\ 1\ -\ 30\ AMPS) \]

\[ I : 1400 \]

\[ R1 = 14\Omega ± Y\% \]

\[ R2 = 14\Omega ± Y\% \]

\[ R3 = 28\Omega ± Y\% \]

\[ V = 0.01 \times I (I) \]

Note: When current metering code is 1 or 2; Y to equal 1.0

When current metering code is 3 or 4; Y to equal 0.1
