1 One pole out of the three poles must be a neutral break.

### Electrical

**Maximum Voltage**
- AC: 240VAC (single pole), 480VAC (3 poles, additional pole shall be dedicated for neutral break)
- DC: 80VDC (single pole & multipole)

**Current Rating**
- 0.1 – 63A. Other ratings available, see Ordering Scheme.

**Auxiliary Switch Rating**
- (optional) Integrated, load side. SPST, 3A – 125VAC, 2A – 30VDC. Auxiliary switch senses the on & off position of circuit breaker handle, as well as contact arm position. Switch connections are screw terminals.

**Insulation Resistance**
- Minimum of 100 Megohms at 500 VDC

**Dielectric Strength**
- UL, CSA: 1960 V 50/60 Hz for one minute between all electrically isolated terminals. G-Series circuit breakers comply with the 8mm spacing and 3750V 50/60 Hz dielectric requirements from hazardous voltage to operator accessible surfaces, between adjacent poles and from main circuits to auxiliary circuits per Publications EN 60950 and VDE 0805.

**Resistance, Impedance**
- Values from Line to Load Terminal - based on series trip circuit breaker.

### Mechanical

**Endurance**
- 10,000 ON-OFF operations @ 6 per minute; with rated current & voltage.
- All G-Series circuit breakers will trip on overload, even when actuator is forcibly held in the ON position.
- The operating actuator moves positively to the OFF position when an overload causes the breaker to trip. With mid-trip, the handle moves to the mid position on electrical trip of the circuit breaker. With mid trip handle with alarm switch, handle moves to the mid position and the alarm switch actuates when the circuit breaker is electrically tripped.

**Trip Free**
- All G-Series circuit breakers will trip on overload, even when actuator is forcibly held in the ON position.

**Trip Indication**
- The operating actuator moves positively to the OFF position when an overload causes the breaker to trip.

**Physical**
- Number of Poles: 1 pole ≤ 63A, 2 poles ≤ 63A per pole
- Weight: Approx. 172 grams/pole (4.13 oz).
- Standard Colors: Housing: Black

**Environmental**
- Designed in accordance with requirements of specification MIL-PRF-55629 & MIL-STD-202 as follows:
  - **Shock**
    - Withstands 100 Gs, 6ms sawtooth while carrying rated current per Method 213, Test Condition "I".
    - Instantaneous and ultrashort curves tested @ 90% of rated current.
  - **Vibration**
    - Withstands 0.060" excursion from 10-55 Hz & 10 Gs 55-500 Hz, @ rated current per Method 204C, Test Cond. A. Instantaneous & ultrashort curves tested @ 90% of rated current.
  - ** Moisture Resistance**
    - Method 106D, i.e., ten 24-hour cycles @ -5°C to +65°C, 80-98% RH.
  - **Salt Spray**
    - Method 101, Condition A (90-95% RH @ 5% NaCl Solution, 96 hrs).
  - **Thermal Shock**
    - Method 107D, Condition A (five cycles @ -55°C to +25°C to +85°C to +25°C).
  - **Operating Temperature**
    - -40°C to +85°C
